

DAVID MAMBOU FOTIE

Full Stack Software Engineer

david.mambou@gmail.com | Portfolio: www.david-mambou.com

CAREER SUMMARY

Full-stack Software Engineer with 4 years of experience across frontend, backend and infrastructure. Transitioned into software engineering in 2021 after a background in civil engineering. Open to contract-based engagements; currently expanding into DB design, infrastructure (Terraform), and AI agentic development.

WORK EXPERIENCE

UPDATER

Software Engineer | January 2026 - Present

- Designed the database and built infrastructure (Terraform) and backend for "TADORi CHAiN," a new product traceability platform tracking origin, carbon footprint, and ownership history
- Refactored backend and built DB synchronization scripts for the corporate energy management system, streamlining staging environment setup
- Defined DB access policies and documentation for the individual energy management system, improving security and operational transparency
- Researched migration path from AWS Cognito to Auth0

Technologies: TypeScript, React, Next.js, Vite, PostgreSQL, MySQL, Prisma, AWS, Terraform, Claude Code, Cursor

Digirise

Software Engineer | May 2025 - October 2025

- Rewrote a legacy AI chatbot application to reduce technical debt and improve maintainability
- Integrated multiple LLM APIs (OpenAI, Claude, Gemini) with switching functionality
- Added support for file formats not natively handled by LLMs (e.g. pptx) via LibreOffice integration

Technologies: TypeScript, Node.js, React, Next.js, Firestore, GCP

ExaWizards

Software Engineer | December 2023 - April 2025

- Built the frontend of an AI meeting-analysis app from Figma designs as a 2-month PoC, contributing directly to winning the client contract
- Improved an AI phone-notification system by grouping multiple faults into a single call per operator, cutting redundant alerts
- Integrated CI/CD pipelines with GitHub Actions and ran AWS EC2 load tests to optimize performance and cost
- Automated container log monitoring (Datadog) and maintained existing microservices

Technologies: TypeScript, React, Next.js, Remix, Node.js (Express), NestJS, Python, Kotlin, AWS, Jest, Docker

BBSakura Networks

Software Engineer | February 2022 - November 2023

- Delivered new frontend features for a B2B network resource management platform and built a new admin panel from scratch in Remix
- Introduced E2E (Playwright) and unit (Vitest) testing, establishing a pre-release QA process where none existed before

Technologies: TypeScript, React, Next.js, Remix, Playwright, Vitest, PostgreSQL

YellowScan - Japan & France

Support & Sales Engineer - LiDAR Surveying | January 2020 - October 2021 | Full time

- Customer Support: trained 10+ customers in the field, supported them on aerial survey projects, ensuring they successfully conduct their missions
- Pre-Sales: product presentations and on-site proofs of concept to 20+ potential customers

EDUCATION

2021 | Le Wagon Tokyo

Full Stack Web Development Bootcamp

2013 - 2018 | INSA Lyon, France

Master of Engineering

SKILLS

Programming Languages

JavaScript, TypeScript, Python, Kotlin, Ruby, Go, HTML, CSS

Frameworks

React, Next.js, Remix, Vite, NestJS, Ruby on Rails

Databases & ORM

MySQL, PostgreSQL, Firestore (Firebase), Prisma

Testing

Playwright, Jest, Vitest

Cloud & Infrastructure

AWS (incl. Aurora, Cloudflare, Amplify), GCP, Terraform, Firebase, Docker, GitHub Actions, Vercel, Heroku

AI Development Tools

Claude Code, Cursor, OpenSpec

Third-Party APIs & Integrations

Twilio, Axios, OpenAI API, Gemini API, LiteLLM

Monitoring & Automation

Datadog, cron

Web Technologies

WebSocket, REST, gRPC

Languages

French, English: Native level

Japanese: Business level (JLPT N1)

German, Italian, Mandarin Chinese, Korean: Conversational level
